

MAF UCR™

Client Side Voice Recording for Microsoft Unified Communications

MAF UCR™

Client Side Voice Recording

Designed specifically for Microsoft Unified Communication, UC Recorder delivers simple to use, cost effective voice recording to assist organisations in training and dispute resolution.

By recording and monitoring calls employees can be assured of the highest levels of training for call handling resulting in increased customer satisfaction.

Specifics of a call can be verified and disputes resolved quickly which also safeguards your employees from abuse.

It has an intuitive browser based interface with easy search and playback or calls can be downloaded in MP3 format.

The client installation is quick and can be automated with calls being stored centrally either to our cloud or on customer premise servers.
